Zusammenfassung von EP 0540861 (A1)

The invention relates to a fire-extinguishing powder, comprising a mixture of base materials which are conventional for fire-extinguishing powders, and at least one thermoplastic rubber, selected from the group consisting of monovinylarene-conjugated diene block copolymers, monovinylarene-monoolefin block copolymers and hydrogenated derivatives of these block copolymers, which are coated or sheathed with small amounts of hydrophobic silica.
